The Swedish Maritime Single Window

User guide for Excel MSWSE Sweden Template 2.2.0

## How to download the Excel MSWSE Sweden Template

There are several places where you can find the file and download it to your computer.

1. You can go to <https://www.sjofartsverket.se/en/services/msw-reportal/guidance/> and there you can choose the one you want.
2. When you are logged in to MSW and have created a new visit you can find the file when you press the question mark behind “Upload list”. You can find the file under “Crew”, “Crew’s Effects”, “Passengers”, “Security”, “Ship-to-ship activities”, “Vehicles”, “Ships store”, “Waste”.

When you have downloaded the file to your computer and want to start editing you need to press “Aktivera redigering”. This is Swedish for “activate editing”. You can find this yellow message on the top when you open the Excel file.

**Note:** As soon as you type in a value that is not accepted in Excel you will get a message:

This means that you can't use a value that doesn't exist in the “reference data” tab.

**Port (UNLOCODE):** In this section you add ports. Make sure you add the right Unlocode. To find the right Unlocode you can visit <https://www.unece.org/cefact/locode/service/location.html>. It is important that the port you want to add in Excel is approved as an actual port. If the port has “1” under the column called [Function](#) it is approved.
